ABOUT TAWAZUN

Tawazun, borne out of the long established Tawazun Economic Council, was created in 2007 to develop ventures through partnerships and strategic investments across a number of areas: defense & aerospace, automotive, munitions, metals and technology.

Tawazun operates as a long-term investor through partnerships, joint ventures and acquisitions. Today, Tawazun is focusing its efforts on economic diversification and sustainability, technology transfer and value addition, and supporting the development of the next generation of leaders.

By setting up various training and capabilities programs and by partnering with a hand-picked selection of world-class leaders, Tawazun is helping to build the skills and expertise required for a competent and capable work force of today and tomorrow.

ABOUT JAHEZIYA

Jaheziya —a Tawazun subsidiary— is a vocational, safety, security and firefighting training center, established in 2011. Jaheziya is a 75,000 square meter facility in Abu Dhabi – the capital of the United Arab Emirates, which operates as a training ground for offshore/onshore, professional firefighting, public safety and health and safety.

Jaheziya aims to improve and sustain the skills, competencies and safety attitudes of the workforce in the UAE and the region through innovative techniques, skills solutions and courses that can be tailored to meet clients' specific needs.

Our unique facilities contain a number of training facilities that offer a range of scenario-based programs which cover various aspects of emergency response in a number of different environments. We reproduce the stress of a real incident so that trainees can practice in a safe, controlled setting, with the ability to repeat exercises.

Disasters and emergencies come in many forms. We specialize in customizing the scenarios needed to meet your training objectives, whether that be as an individual exercise or as a multi-agency training collaboration.

Serious times require serious training, and there is no other disaster management training platform available in the region today than Jaheziya.

A CLOSER LOOK AT OUR FACILITY

As the challenges and dynamics of national security and disaster continue to evolve, emergency management agencies need to reinvent and recalibrate their delivery.

Our facilities have been designed to recreate incidents and perceived threats that could be faced in the real world. The 'scenarios' we train cadets on provide them with the chance to communicate and interact with their counterparts, ensuring successful performance - from start to finish.

THE JAHEZIYA PARK BOASTS

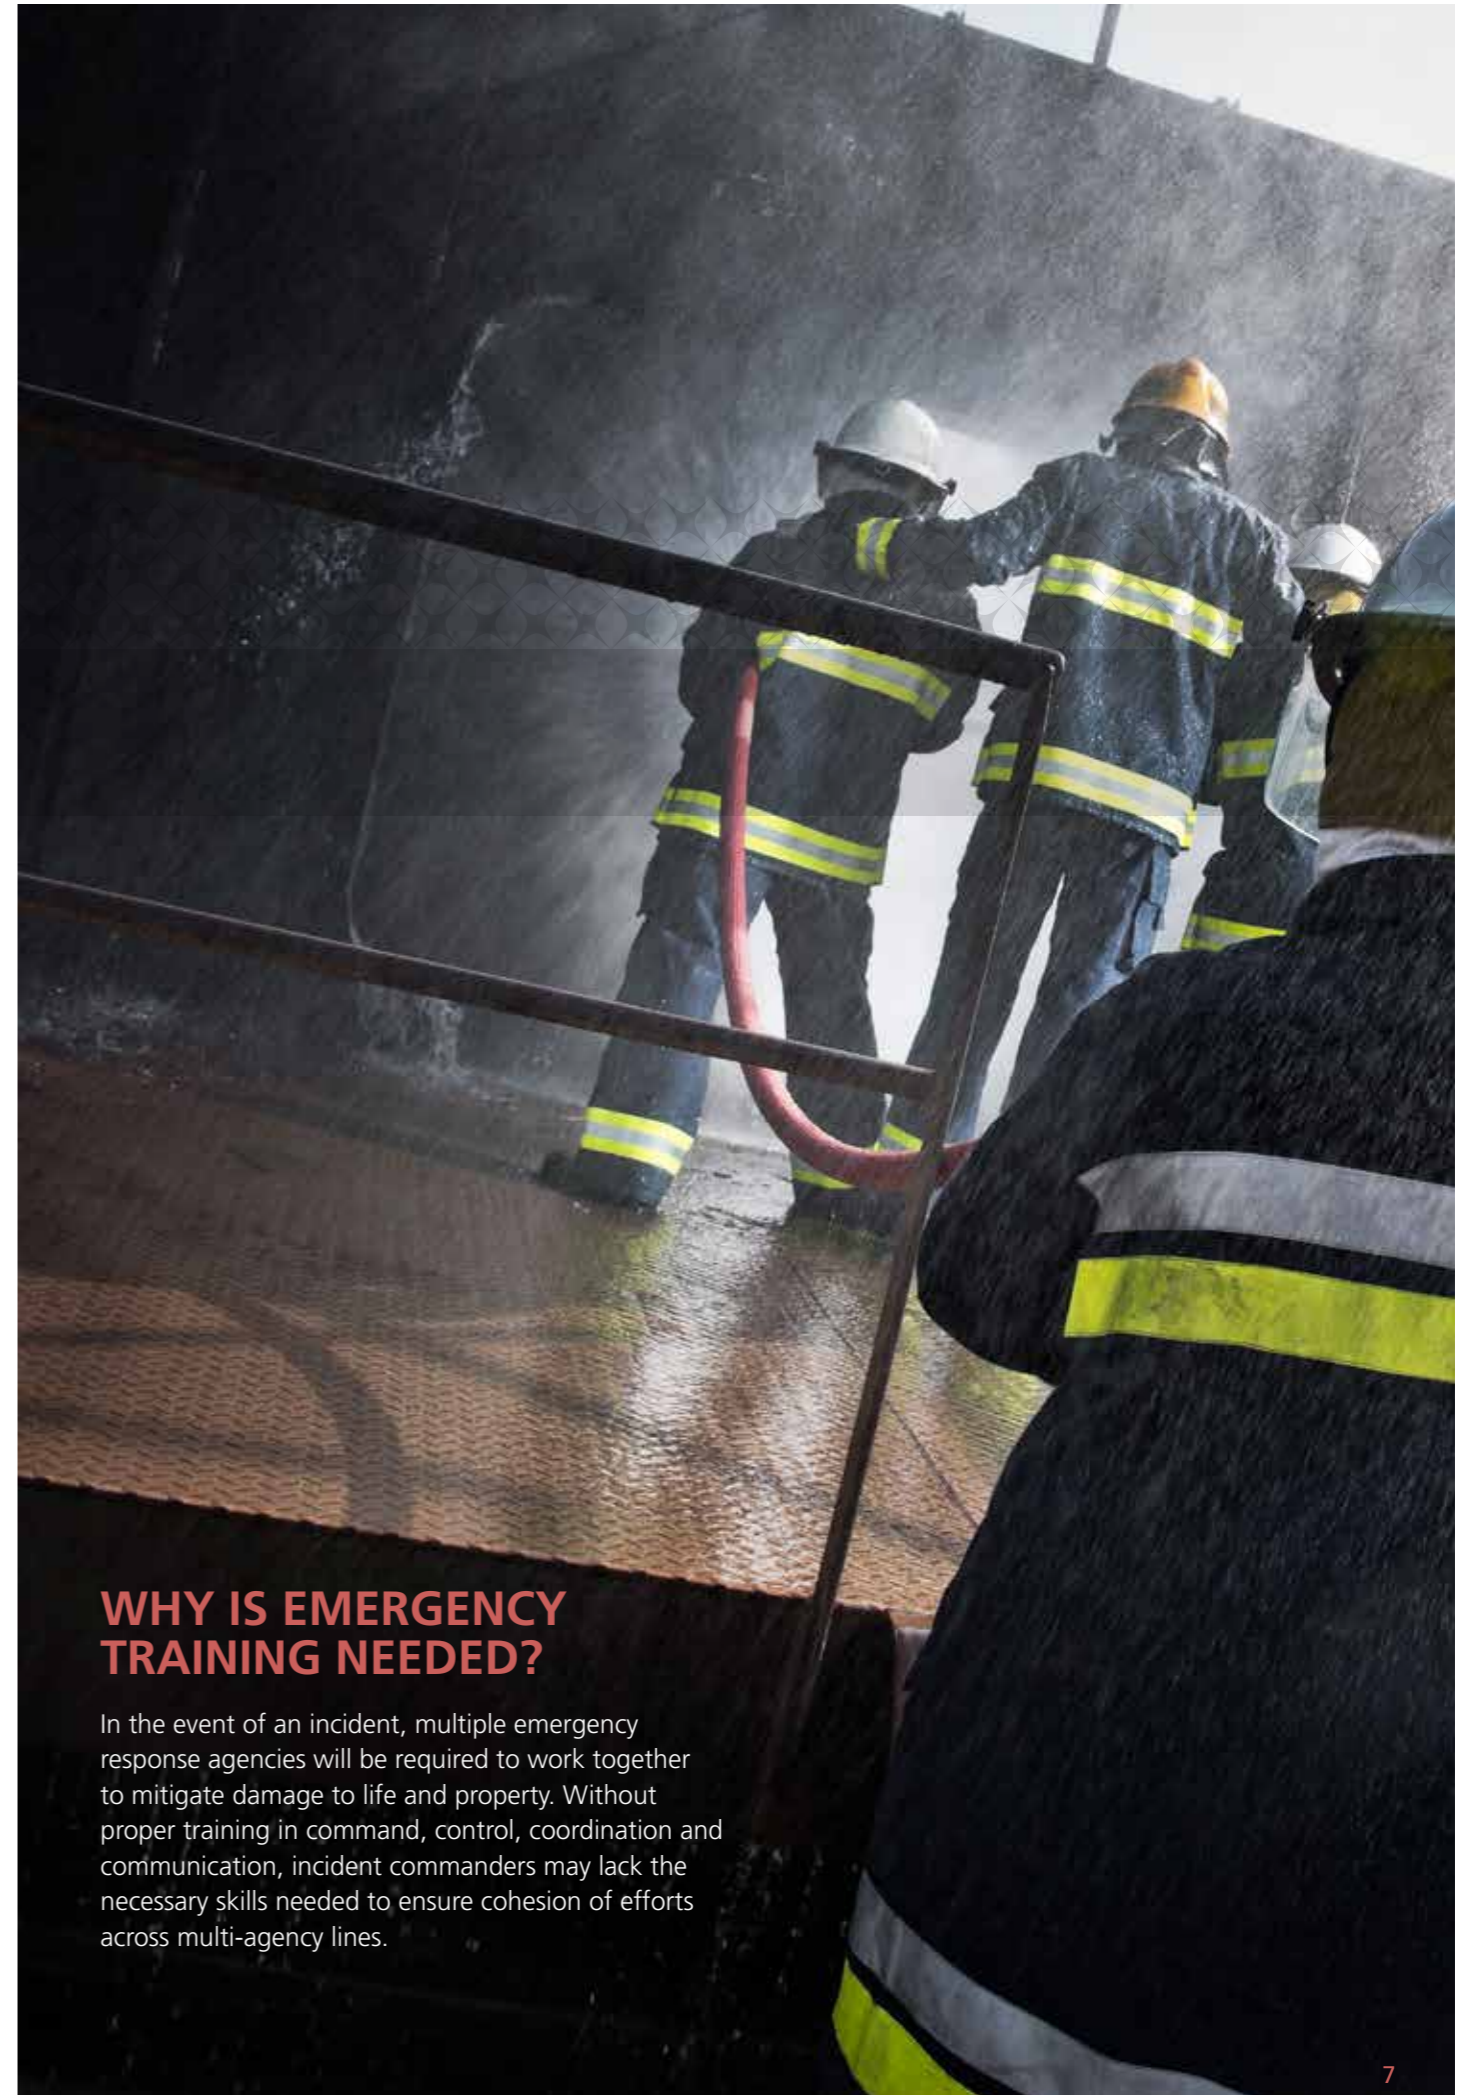

- A spacious orientation building
- 12 fully equipped classrooms outfitted with the latest smart technology and training aids
- Designated changing areas for males and females
- Multi-lingual staff
- 60 room dormitory - single and shared basis
- A restaurant with catering services serving buffet breakfast, lunch and dinner
- A recreational facility featuring a fully equipped gym, basketball court, TV lounge, etc.
- Spacious break out areas for delegates and trainees

OUR TRAINING FACILITIES OFFER

- A functional survival training pool with Helicopter Underwater Escape Training (HUET) functions such as a man-riding hoist, various types of life rafts, an indoor boat with a davit launch system, etc.
- A fire ground training area to simulate challenging environments
- A confined space entry room for Search & Rescue training
- Personal protection equipment
- A ship simulator for various types of damage control training
- A fire truck
- Hydrogen Sulfide training area
- A Mobile Multifunctional Safety Education Unit
- A mobile aircraft for aviation firefighting training
- A mobile industrial Hazmat trainer

WHY IS EMERGENCY TRAINING NEEDED?

In the event of an incident, multiple emergency response agencies will be required to work together to mitigate damage to life and property. Without proper training in command, control, coordination and communication, incident commanders may lack the necessary skills needed to ensure cohesion of efforts across multi-agency lines.

OUR OFFERING PROGRAMS AND COURSES

Our programs incorporate world class standards and the latest syllabi. We deliver a comprehensive range of courses in the fields of onshore and offshore rescue, firefighting, safety and emergency response, to meet national and international standards such as the UAE Civil Defense, NFPA, IMO, OPITO, First Aid International, and NEBOSH.

In addition to the theoretical knowledge applied in classroom settings, teams undergo scenario-based training.

Our highly experienced instructors, together with our international training partners, can help develop curriculums that are tailored to meet your specific needs, by employing innovative techniques and skill-oriented solutions to ensure cadets get the best out of their training.

Jaheziya aims to progressively introduce more programs/courses to satisfy the training requirements of all clients. Some of the courses currently on offer today include:

PROFESSIONAL FIREFIGHTING & NFPA COURSES

- Al Hosn Gas
- ZADCO
- FIRTIL
- RABDAN ACADEMY

A GLIMPSE INTO THE FUTURE

Jaheziya has witnessed unprecedented growth since its formation. To meet the demand and continue delivering quality disaster management training, we appointed AECOM as the project management company to spearhead plans for the construction of an one square kilometer world-class integrated disaster management city with multiple training wings, zones and support facilities, including props and simulators.

The facility will cover all industries with a high degree of potential hazards such as Maritime, Rail Transport, Construction, Medical, Aviation, Industrial, CBRN & Hazmat, and Fire Fighting etc.

WHY CHOOSE JAHEZIYA?

We offer the right training grounds to build highly skilled leadership teams prepared to cohesively coordinate and manage the efforts of all emergency response and first responder personnel in a true-to-life, safe and controlled environment.
